The Love of Dirt.

The love of dirt is among the carliest of passions, as it is the latest. Mud-pies gratify one of our first and best instincts. So long as we are dirty we are pure. Fondness for the ground comes back to s man after he has run the round of pleas ure and business, eaten dirt and sown wild oats, drifted about the world, and wild oats, drifted about the world, and taken the wind of all its moods. The love of digging in the ground (or of looking on while he pay another to dig) is as sure to some back to him as he is sure at last to go under the ground and stay there. The Back Suction Preventive is attached to the stuffing box, and works in such a way that it completely shuts up the space between the s'uffing box and tubing so effect sally that not a pa tole of six can get through at any time while the tubing is being drawn and replaced. It supplies a want long felt and is without question one of the mat valuable inversions of the day to those enpaged in the oil producing business. Nowell should be without one, sait off-niumes saves ten times its cost by once using.
